

pricelist of oligonucleotides on microplate

updated: 25.4.2012

basic pricelist

item	price*
Set of 96 oligonucleotides (up to 30 bases, incl.) on 96-well-microplate	920,00 €
Set of 96 oligonucleotides (up to 40 bases, incl.) on 96-well-microplate	920,00 €
Set of 96 oligonucleotides (up to 50 bases, incl.) on 96-well-microplate	1 120,00 €
Set of 96 oligonucleotides (up to 60 bases, incl.) on 96-well-microplate	1 320,00 €

* Uvedená cena je účtována za destičku.

surcharges to the price of an microplate

item	price
Surcharge for unification of molar amounts of all oligos (equimolar microplate)	80,00 €
Surcharge for 5'-amino modification	240,00 €
Surcharge for inosin (for every 100 inosins)	120,00 €

- The output is a standard 96-well microplate with dry oligonucleotides whose sequences and locations on the array have been defined by customers when ordered.
- The volume of the well (2 mL) enables the oligo to be ordinarily dissolved.
- The molar amounts of the oligos in the wells are either unadjusted (they differ among the wells), or unified to one equimolar value (then it is possible to dissolve all the oligos by even volume of water or buffer).
