A customer becomes a *favoured customer* for the rest of the year and for the following year after he has ordered oligos or probes which apply to cumulative consumption of 2000 nucleotides within this year (on every scale, term, type of modification, purification or any other arrangement). Cumulative consumption of bases will also be increased for the customer for every order of **dual-labeled probes** by **100 points** (per probe in an amount of 1 nmol), by **200 points** (per probe in an amount of 5 nmol), by **300 points** (per probe in an amount of 10 nmol), by **500 points** (per probe in an amount of 50 nmol), respectively.
